JAVA COMPUTER TECHNOLOGIES

Java Computer Technics is a Qatari enterprise with limited liability structure; it is a pioneering company in providing technical and administrative consultancy, as well as IT services.

We comprise of many local and multinational experts of varying specializations, thus unifying many years spanning expertise in the fields of public administration and private sector management, within the IT and telecommunications cores.

WHO WE ARE

Java Computer Tech (JCT) was set up in 2004 by Osama S.M. Initially selling computer services and accessories along with security equipment, the company branched into software development a few years later, and now offers its clients software packages which can be customized as the client's company develops and expands.

The idea was kick started when Osama was working with a private clinic several years ago. He noticed that although the software products they were using were reasonable, they came with absolutely no ongoing technical support. Osama saw this gap in the market and tapped into it by developing software and offering it with a comprehensive back up service.

This approach has proved to be very successful and JCT now has a large team of software developer experts and an impressive number of satisfied clients. As well as developing software, the company is an agent for other specialized software and offers a website builder service, all of which are indispensable for the Start Up company in Qatar.

OUR SERVICES

The consultation services that are introduced by Java Computer Technics either administrative, technical or IT are considered to be the main work field of the company. According to the market needs, the increasing requirements and the dearth of companies specializing in the field with higher degrees of experience and proficiency, the company has considered introducing various packages of services with our distinguished formula according to the Total quality standards of Java Computer Technology to support our customers.

01

MAINTENANCE & CONTACT

JCT identifies all devices that are part of your network and will create support contract specifically to your needs and your desired response times.

02
